

Data Warehouse RFQ Questions Received

- What data besides assessment scores should teachers be able to add/edit/delete?
 - Teachers should be able to add/edit/delete intervention data such as goals, strategies, progress.
- Graphically display in what manner? Do you have specific chart and graph types in mind?
 - Dashboards i.e. Speedometer dashboards, pie charts, bar graphs, etc. at each user level that can be drilled down into groups of students and individual students.
- Colors and fonts should be customizable to what degree? The solution as a whole should support WPS specific branding such as school colors, logos and typeface throughout, or with the generation of each report, the user should be able to specify colors and fonts?
 - At the district level, a color coding system should be customized for each assessment. Some assessments may require 3 colors, other assessments more colors. This should be under district control.
- The system should support final term grades, or act as a gradebook with support for entry and display of all coursework grades?
 - The system should sync with powerteacher so that assignment, exam and term grades can be used in analysis. The PowerTeacher gradebook is the gradebook that will continue to be used.
- Administrators and educators would be able to manually flag specific students as being "at risk", or the system should programmatically identify "at risk" students based on specified data conditions?
 - Both
- Will you be sharing questions and answers among all respondents?
 - Yes via posting on the Weston Public Schools website.
